## The Accountant

**Directions:** Each group of questions in this section is based on a set of conditions. In answering some of the questions, it may be useful to draw a rough diagram. Choose the response that most accurately and completely answers each question and blacken the corresponding space on your answer sheet.

### Questions 1–5

An accountant assigns double-digit codes to four different clients—Frank, Gardner, Hunt and Jordan. The codes are made using the digits 1 through 8, and the accountant uses each digit only once. The following conditions must apply:

The code with a six in the tens place has a three in the units place.

Hunt's code has a higher numeric value than Jordan's code does.

Frank's code has the highest numeric value.

Jordan's code ends with a two.

Three of the four codes are even.

- Which one of the following could be an accurate account of the codes assigned to the four clients?
  - Frank: 74; Gardner: 52; Hunt: 63; Jordan: 18
  - Frank: 74; Gardner: 53; Hunt: 68; Jordan: 12
  - Frank: 74; Gardner: 12; Hunt: 58; Jordan: 63
  - Frank: 74; Gardner: 58; Hunt: 63; Jordan: 12
  - Frank: 85; Gardner: 74; Hunt: 63; Jordan: 12
- Which one of the following could be true?
  - Gardner's code begins with a 4.
  - Hunt's code begins with an 8.
  - Hunt's code begins with a 1.
  - Gardner's code ends with a 1.
  - Gardner's code ends with a 4.
- If Gardner's code has a lower numeric value than Jordan's code, which one of the following must be false?
  - Gardner's code ends with a 4.
  - Gardner's code ends with a 3.
  - Gardner's code ends with an 8.
  - Frank's code ends with a 4.
  - Frank's code ends with an 8.
- If Gardner's code has a higher numeric value than Jordan's code, and if Gardner's code is even, each of the following must be true EXCEPT:
  - Hunt's code has a higher numeric value than Gardner's code.
  - Jordan's code is comprised of the two lowest valued digits.
  - Frank's code has a higher numeric value than Gardner's code.
  - The units digit for Frank's code is higher than the units digit for Hunt's code.
  - The units digit for Frank's code is higher than the units digit for Gardner's code.
- If the accountant assigns the Hunt account the code 54, which one of the following represents a complete and accurate list of other account codes that can be determined?
  - Frank
  - Gardner
  - Jordan
  - Frank, Jordan
  - Frank, Gardner, Jordan
